CUTTING-EDGE ENGINEERING

With industry tie-ups and focus on research, IIT Delhi continues to nurture brilliant minds who can tackle global challenges with innovative solutions

BY SHELLY ANAND

Amid the rapidly evolving landscape of technology, where groundbreaking advancements are reshaping industries and societies, the Indian Institutes of Technology (IITs) play a pivotal role in nurturing innovative minds and providing practical solutions to real-world challenges. Among these prestigious institutions, IIT Delhi stands tall as a beacon of excellence.

Established in 1961 as the College of Engineering, IIT Delhi has consistently been ranked as the undisputed leader in engineering studies at the undergraduate, postgraduate and PhD levels. The campus exudes a combined air of seriousness and cool, fostering an environment that inspires students to excel in every endeavour. So far, IIT Delhi has produced 60,000-plus graduates across diverse disciplines, including Engineering, Physical Sciences, Management, Humanities and Social Sciences. Among them, 15,738 have earned BTech degrees, a testament to IIT Delhi's steadfast dedication to shaping the brightest minds in engineering, ready to make a lasting impact on the global stage. ■

GURUSPEAK

"We focus on keeping our curriculum and research relevant to the needs of society and encourage our students and faculty to work on their ideas. We believe that in the changing environment we need to keep reinventing ourselves by introducing new courses and modifying our existing offerings"

PROFESSOR RANGAN BANERJEE
Director, IIT Delhi
