HEALTH ICONS EMPOWERING INDIA'S MEDICAL CARE LANDSCAPE

The Indian healthcare sector is growing by leaps and bounds with the coming of AI technology, advanced techniques of interventions, access to state-of-the-art diagnostics giving accurate assessment and precision results. Behind these advancements and its use lie the skilled hands and knowledge of highly qualified doctors. India is fortunate to have some leading pioneers, who are the inspiring force behind building an incredible healthcare sector envied by the world as patients from abroad make a beeline to celebrated doctors and hospital brands, and it continues!

The Indian healthcare sector emerged from the doldrums in the 1980's to gradually grow as advancements trickled into the premises of hospitals, mostly in urban areas. Gradually, Indian doctors studying and working abroad quit lucrative opportunities and jobs returning to their homeland and putting in their heart and soul to improve the healthcare deliveries bringing relief to a teeming population afflicted with some health issues or the other. It also provided a wide playing field to experiment, research and develop healthcare that fit the Indian need. The outflow of affluent patients to hospitals in the west and paying heavily for treatments saw a slow reversal as the early doctors, most of them iconic pioneers of their respective fields proved their superior skills, ingenuity, compassion and unwavering commitment to their profession and call of duty. They were capable of winning the confidence of patients and the financial drain slowed down, resulting in the funds being invested in the country to further strengthen healthcare. These doctors proved to be very enterprising, far-sighted and determined to release the Indian healthcare from the clutches of despondency. They are the true visionaries and warriors, who safeguarded and nurtured the Indian medical system at its infancy.

The outflow of affluent patients to hospitals in the west and paying heavily for treatments saw a slow reversal as the early doctors, most of them iconic pioneers of their respective fields proved their superior skills, ingenuity, compassion and unwavering commitment to their profession and call of duty.

Among the earliest health institutions was the All India Institute of Medical Sciences (AIIMS), which focused on academics, training, treatment and research and so it won't be out of place to say that it's the mother of healthcare establishments in the country. Doctors in large numbers who passed out of AIIMS were absorbed in other hospitals, both government
