FOCUS
COIMBATORE

While Tamil Nadu already has the highest percentage of women working on the factory floor, including Coimbatore, the Government is planning to take this number even higher.

Facilitation of ease of doing business remains a top priority through streamlining the process for obtaining necessary permits, licenses, and approvals. To attract large-scale investments, the Government is setting up new Special Economic Zones (SEZs) and industrial parks in and around Coimbatore. Skill development, strategic Public-Private Partnerships (PPPs) and sustainable development are also key focus areas.

At the TAMIL NADU INFLUENCE event held in December 2023, at least 27 small and medium-scale industrial units officially entered into MoUs, signifying investments totalling Rs 1,241 crore for Coimbatore district. Apart from this, over 200 companies expressed interest in investing approximately Rs 6,573 crore in Coimbatore in the upcoming years. These investments will result in the creation of around 22,000 direct employment opportunities.

AN INDUSTRIAL POWERHOUSE

Coimbatore, often dubbed the 'Manchester of South India', has long been a prominent industrial hub known for its robust textile, manufacturing, and engineering sectors. In recent years, the city has witnessed significant developments that have further solidified its status as an industrial powerhouse.

Coimbatore has seen the establishment and expansion of several industrial parks and Special Economic Zones (SEZs), which provide world-class facilities for manufacturing and industrial operations. The CODISSIA Industrial Park, developed by the Coimbatore District Small Industries Association, supports small and medium enterprises (SMEs) with modern facilities and services. On the other hand, CHIL SEZ specialises in IT and ITES, and has attracted significant investments from technology companies. And new ones are on the anvil.

Coimbatore has seen the establishment and expansion of several industrial parks and Special Economic Zones (SEZs), which provide world-class facilities for manufacturing and industrial operations.

While traditionally known for textiles and engineering, Coimbatore's industrial landscape is seeing significant diversification.

Key sectors experiencing growth include:

- **Automotive Components:** Coimbatore is emerging as a major hub for the automotive component industry, with several global and domestic companies establishing manufacturing units.
- **Pump and Motor Manufacturing:** The city continues to be a leader in the production of pumps and motors, supplying both the domestic market and international markets.
- **Foundries and Casting:** Coimbatore's foundries are renowned for high-quality castings, serving various sectors such as automotive, machinery, and aerospace.
- **Food Processing:** The agro-based industry is growing, with investments in food processing units, cold storage facilities, and related infrastructure.

Coimbatore's industrial sector is increasingly embracing technological advancements and innovation. The integration of Industry 4.0 practices, including automation, IoT, and data
