which can be given twice a month or once in six months. These injectable drugs bring down the LDL levels significantly and patients are more tolerant and complaint to these as they have to take an injection once in six months.

How are heart failure patients being treated to prolong their lifespan?

Heart failure is as a condition where heart muscle becomes weak and is not able to perform its function property to meet oxygen, requirements of vital organs such as brain, lungs, kidney and liver. It is basically ending stage heart disease and any Cardiac Disease like Coronary, Valvular or congenital heart disease and Cardiomyopathies can lead to heart failure.

Heart Transplant and Left Ventricular assist device (LVAD) are the possible treatment for advanced heart failure. Availability of donor hearts is very limited in India, In such situations LVAD plays a major role as bridge to transplant or as a destination therapy. LVAD takes over the function of the left ventricle thus improving the heart function and blood flow to the vital organs. It improves quality of life and longevity in such patient who were not able to perform even their daily chores, not able to walk for few steps unable to breath and sleep property.

CREDENTIALS AND EXPERTISE

- Fellowship in cardiac surgery from department of thoracic & cardiovascular surgery, University Hospital, Uppsala, Sweden.
- Minimally invasive cardiac surgery, Medtronic inc. Minneapolis, USA
- Port access cardiac surgery, Heart Port Training Institute, Salt Lake City, Utah, USA
- Training in Da Vinci Robotic Cardiac Surgery, Invasive Surgery Centre, Ohio State University, USA
- Myocore Institute valve repair - Beating Heart Training at Myocore Institute at Minneapolis, USA
- Heart Failure Surgery
- Extra Corporeal Membrane Oxygenation-ECMO
- Left Ventricular Assist Device-LVAD
- Heart Transplant
- Robotic Cardiac Surgery
- Minimally Invasive Cardiac Surgery I.E. Minimally Invasive Coronary Artery Bypass Grafting(CABG), Mitral Valve Replacement & Repairs, Aortic Valve Replacement & Repairs, Atrial Septal Defects (ASD Surgery)
