# NTPC's REMARKABLE JOURNEY OVER THE PAST DECADE

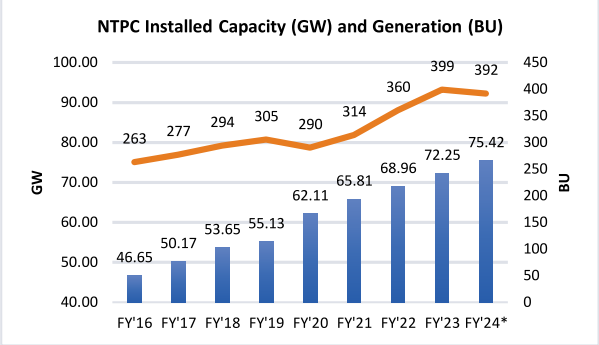

In the dynamic landscape of India's power sector, NTPC Limited has emerged as a key player, steering the nation towards energy security, economic growth, and sustainability. Over the past decade, NTPC has not only maintained a robust power generation capacity but has also diversified its energy portfolio, aligning its actions with national priorities.

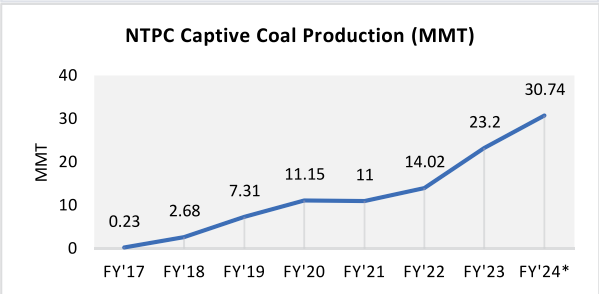

## CONTRIBUTING TO NATION'S ENERGY SECURITY

NTPC plays a pivotal role in ensuring energy security by contributing approximately 25% of India's power demand with a substantial 17% share in the country's total generation capacity. The coal-based plants operated by NTPC consistently outperform the national average, maintaining a Plant Load Factor (PLF) that remains 8-11% higher. The NTPC group has generated a staggering ~3000 billion units of power since the fiscal year 2014-15.

Over the past decade, NTPC has marked significant achievements, underscoring its prowess and commitment to meet the nation's energy needs. As of February 29, 2024, NTPC has successfully produced an impressive 100.33 million metric tons of coal from its captive mines.

NTPC has augmented its power generation capabilities by adding a substantial total capacity of ~34 GW, including approximately ~3.4 GW in renewable energy in the past decade.

Further solidifying its position in the renewable energy landscape, NTPC has successfully secured ~11.3 GW through competitive bidding for various renewable projects. This strategic move is part of NTPC's forward-looking plan to develop an impressive 60 GW of renewable energy by the year 2032.

## SUPPORTING ECONOMIC GROWTH

NTPC's actions are closely aligned with the Indian government's economic growth policies, evident in its significant capital expenditure (CAPEX) achievements, totaling ~Rs. 2.8 Lakh Crore since the fiscal year 2014-15.

NTPC has been a consistent distributor of dividends, providing INR 44,935 Crore since the fiscal year 2014-15. Additionally, NTPC has actively participated in the Government e-Marketplace (GeM) procurement, making total purchases of approximately ~₹62,172 Crore.

## CLEAN ENERGY GROWTH & ENERGY TRANSITION

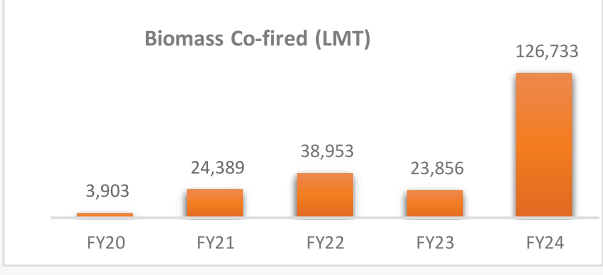

NTPC stands at the forefront of spearheading transformative initiatives in clean energy and the ongoing energy transition. One of its notable achievements includes the commissioning of India's largest 100 MW floating solar station at Ramagundam. This project contributes significantly to NTPC's broader commitment to clean energy, evident in its total floating solar portfolio, which now stands at an impressive 262 MW.

NTPC became the first energy company in India to declare Energy Compact goals as part of the UN High-level Dialogue on Energy.

NTPC's commitment to green hydrogen is evident through its pioneering initiatives, such as the commissioning of a 5% green hydrogen-PNG blending project at Kawas. NTPC has further demonstrated its dedication to innovative solutions with the successful trial run of a Hydrogen Fuel cell Electric Vehicle (EV) in Ladakh, marking a significant step towards the integration of green hydrogen in transportation. In addressing the environmental impact of carbon emissions, NTPC has implemented a Carbon Capture and Utilization project, which includes commissioning of a pilot project featuring a 20-tonnes-per-day (TPD) CO2 capture plant.

## ENVIRONMENT PROTECTION

In line with its commitment to environmental sustainability, NTPC's Blue Sky Initiative involves co-firing biomass with coal for power generation. This initiative has led to the blending of ~2.18 million metric tons of biomass

with coal since FY'20, resulting in significant savings in terms of farm fires and contributing to the improvement of air quality.

## SOCIAL EMPOWERMENT

NTPC has taken significant strides in social empowerment and development through various initiatives. The Girl Empowerment Mission (GEM) stands out as an annual residential workshop benefiting 7400 girl students across 40 NTPC projects. NTPC's collaboration with the Archery Association of India (AAI) since 2018 has played a pivotal role in supporting the promotion of archery on both national and international platforms.
