A DECADE OF GROWTH

POWERGRID LEADING THE PATH TOWARDS SUSTAINABILITY

In the expansive realm of India's energy landscape, one entity emerges as a beacon of progress, shaping the nation's developmental trajectory – the Power Grid Corporation of India Limited (POWERGRID), a 'Maharatna' Public Sector Enterprise. POWERGRID transcends its role from a mere transmission utility; it serves as the lifeline linking aspirations to accomplishments, fueling advancement throughout the nation.

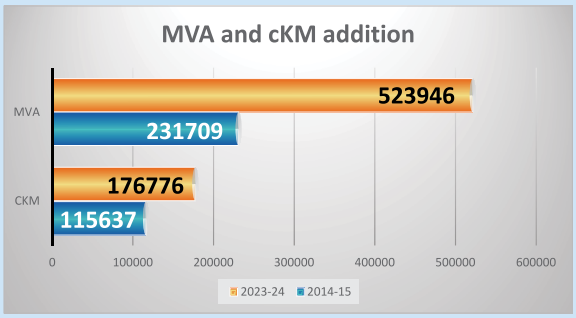

A PILLAR OF INFRASTRUCTURE

Central to POWERGRID's ethos is a steadfast dedication to delivering reliable and efficient power transmission services while upholding the tenets of sustainability and social responsibility. With a transmission network encompassing approx. 1,76,776 circuit kilometers of lines and a power transformation capacity exceeding 5,23,946 MVA, POWERGRID stands as the backbone of India's power infrastructure. Boasting 277 strategically located substations with an impressive 99.86% system availability, POWERGRID ensures seamless electricity transmission, catalyzing economic growth and prosperity. Over the past decade, POWERGRID has commissioned numerous landmark projects aimed at fortifying the national grid, such as the High Voltage Direct Current (HVDC) Raigarh-Pugalur-Thrissur (RPT) Transmission System and the Champa-Kurukshetra HVDC system. These endeavors, leveraging cutting-edge technologies and meticulous planning, not only enhance connectivity but also significantly contribute to India's 'Make in India' initiative. Notable among these is the Srinagar-Leh Transmission System, an engineering marvel inaugurated by Hon'ble Prime Minister Shri Narendra Modi, symbolizing connectivity across the nation. Today, India proudly hosts the world's largest integrated synchronous grid, facilitating seamless power flow across regions.

EMBRACING SUSTAINABILITY, INNOVATION, AND EXCELLENCE

Through initiatives like the Green Energy Corridor and Transmission Schemes for Ultra Mega Solar Power Parks, POWERGRID spearheads the transition towards a cleaner, more sustainable energy ecosystem. Committed to achieving net-zero emissions by 2047, water positivity by 2030, and zero waste to landfill by 2030, POWERGRID invests in research and development, focusing on energy-efficient technologies and automation. Collaborations with esteemed academic institutions further bolster POWERGRID's capabilities, particularly in asset management and cybersecurity.

Facilitating Growth through Consultancy & Telecom Ventures Beyond its core transmission services, POWERGRID offers consultancy services in transmission, distribution, and telecom sectors domestically and internationally. From exploring transmission opportunities for renewable energy projects to venturing into the field of Green Hydrogen, POWERGRID's consultancy arm plays a pivotal role in shaping the future of energy infrastructure. Its telecom subsidiary, PowerTel, maintains a robust network spanning over 100,000 kilometers, ensuring backbone availability at more than 3000 locations.

GLOBAL REACH

POWERGRID's influence extends beyond borders, with a presence in 23 countries worldwide, notably in South Asia, Central Asia, Africa, and Europe. Renowned for its prowess in executing projects in challenging terrains, POWERGRID actively participates in endeavours aimed at enhancing energy access and reliability globally.

RECOGNITION AND AWARDS

PROFITABILITY AND PERFORMANCE: POWERGRID has been ranked 1st in Services Sector across categories as per the "Public Enterprises Survey 2022-23" published by the Department of Public Enterprises, Govt. of India.

EXCELLENCE IN POWER TRANSMISSION: Received CBIP India Award for 'Best Performing Power Transmission Utility- Central Sector'. - "Dun & Bradstreet PSU Award 2023" in Power Transmission (Central PSUs) Category.

SUSTAINABILITY AND SOCIAL RESPONSIBILITY: "Global Gold Award" at The Green World Awards and Platts Global Energy Award under the "Corporate Impact - Targeted Programme" category for POWERGRID's project "Improving Rural Livelihoods and Protecting Environment through farmer-centric Integrated Watershed Management" - "International CSR Excellence Award-2023" for Vishram Sadan project at AIIMS Delhi.

INNOVATION AND LEARNING & DEVELOPMENT: Secured 17th position among 72 leading global companies at the prestigious ATD Best Awards 2023 for excellence in Learning & Development.
