

INDRAPRASTHA GAS LTD. FLAGBEARER TO INDIA'S ATMANIRBHAR & NET ZERO JOURNEY: PAVING THE WAY FOR A DEVELOPED AND SUSTAINABLE FUTURE

Responding to the clarion call of our Prime Minister Narendra Modi to make Atmanirbhar bharat and aligning with his visionary roadmap for a developed India by 2047, Indraprastha Gas Ltd. (IGL) emerges as a frontrunner in the nation's ambitious quest for Atmanirbharta and net zero emissions.

IGL is known for its transformative role in elevating NCR from the grips of ever worsening air pollution and established the CNG revolution in the country.

Natural Gas has been universally accepted as the transition fuel and NG is the way forward for the country like ours, serving its many stated goals like energy self-sufficiency, subsidy elimination, SDG, pollution reduction and import substitution thus powering India's journey to be " Viksit Bharat" by 2047.

Now with a strategic focus on indigenisation, environmental stewardship and sustainability, IGL is set to again revolutionize the energy landscape, spearheading transformative actions towards greener, cleaner future. It has to be to appreciated that with each molecule of gas we sell we help in reducing pollutants and assist someone to breathe healthier.

IGL's strong focus on CBG production and industry first initiative like manufacturing of gas meters strongly contributes to import substitution and Make in India themes of the government.

Setting up of CBG plants also helps in creating local entrepreneurship and associated employment opportunities thus boosting real income along with waste reduction.

IGL aspires to be a digital first company-utilising automation and digitalisation to improve efficiencies and surpass global standard set for utilities like us.

Driven by a fervent dedication to environmental responsibility, IGL embarks on a holistic decarbonisation journey, encompassing all facets of its operations and constantly working to provide more of green fuels like RLNG, LNG and Hydrogen going forward to public at large.

With its unending commitment to reducing greenhouse gas (GHG) emissions across its operational spectrum we have set a precedent for corporate sustainability in India.

IGL has framed its own net zero strategy and central to it is a meticulous roadmap, designed to address emissions across different scopes.

From direct emissions stemming from fuel combustion and fugitive sources to indirect emissions associated with electricity consumption and other operational activities, IGL leaves no stone unturned in its quest for carbon neutrality.

The action plan devised by IGL outlines a multifaceted approach, increasing operational efficiencies, leveraging renewable energy, alongside initiatives for transitioning to electric vehicles. Furthermore, energy-efficient practices and carbon capture strategies underscore the company's commitment to innovation, indigenisation and environmental leadership.

By embracing these initiatives, IGL not only promotes localisation, digitalisation, mitigates its carbon footprint but also contributes to India's broader sustainability goals. In alignment with Prime Minister Modi's vision for a 'Viksit Bharat' (Developed India) by 2047, IGL emerges as a torchbearer of progress, catalysing a green revolution that transcends boundaries and inspires collective action.

Moreover, IGL's proactive stance resonates with the broader ethos of corporate responsibility and societal engagement. As a responsible corporate citizen, IGL recognizes the imperative of fostering sustainable practices, driving positive change, and safeguarding the planet for future generations.

In conclusion, as India marches steadfastly towards a future defined by progress and sustainability, Indraprastha Gas Ltd. stands at the vanguard of this transformative journey. Through its unwavering commitment to net zero emissions and environmental stewardship, IGL epitomizes the spirit of 'Viksit Bharat,' heralding a new era of prosperity, innovation, and environmental harmony.
