▲ FIRESIDE CHAT: WOMEN AND MENTAL HEALTH—MANAGING THE MIND

TAKEAWAYS

"Accept that ups and downs are part of our existence. Learn to look after yourself. Self-care is most important as far as mental health is concerned. Which means your thoughts, your feelings, your behaviour, introspection about it, and changing the things that you can change reasonably are very important. Relaxing the mind is important just like physical exercise is. Have some kind of stress-buster—be it mindfulness, yoga, taking a walk or learning music"
